

CHANDRAKANTH SIVA KUMAR

✉ sivakumarchandrakanth@gmail.com ☎ +91 7989622326

Summary

Detail-oriented Electronics and Communication Engineering undergraduate with proficiency in C and Python, complemented by hands-on experience in digital circuit design and simulation. Strong analytical thinking, adaptability, and problem-solving abilities, with a keen interest in software development and emerging technologies. Seeking an opportunity to contribute to innovative software solutions while continuously enhancing technical expertise.

Education

Secondary School Certificate, Vishnu Vidya Mandir High School 2021
Marks: 600

Mathematics, Physics and Chemistry (MPC), Narayana Junior College 2021 – 2023
Percentage: 96.80%

B.Tech in Electronics and Communication Engineering (ECE), G.Pulla Reddy Engineering College (Autonomous)
CGPA: 8.28

Technical Skills

Programming Languages

C, Python, Basic VHDL

Core Languages

Data Structures, OOPS, Digital Electronics, DBMS.

Tools & Technologies

Cadence Virtuoso 6.1.7, Jupyter Notebook, Arduino IDE, Cadence Incisive, Vivado

Soft Skills

Team collaboration, Time Management, Problem Solving, Analytical Thinking.

Experience

Python Programming Intern, BIST Technologies Pvt.Ltd

- Developed Python-based applications and strengthened problem-solving skills through hands-on programming tasks.
- Worked with Python concepts including data structures, functions, file handling, and object-oriented programming.
- Applied programming knowledge to complete assigned tasks and gained practical software development experience.
- Collaborated with mentors and enhanced debugging, analytical, and coding skills during the internship.

Projects

CMOS Full Adder Design using Cadence Virtuoso

- Designed and implemented a CMOS Full Adder using Cadence Virtuoso with GPDK 180nm technology.
- Performed schematic design and DC analysis to verify the functionality and performance of the circuit.
- Simulated and analyzed the design using Cadence tools on Red Hat Enterprise Linux (RHEL 7.7).
- Gained practical exposure to CMOS design principles, circuit simulation, and VLSI design flow.

Smart LPG Cylinder Monitoring and Auto-Booking Alert System Using Arduino

- Monitors the LPG cylinder gas level using sensors connected to an Arduino.
- Processes the sensor data to identify when the gas level becomes low.
- Uses GSM technology to send SMS alerts to the user about the LPG status.
- Automatically triggers an LPG refill/booking alert, helping prevent unexpected gas depletion.

Certifications

NPTEL - Programming in Java (Elite)

GATE 2026 - Qualified

Workshop on Radio Access Technology

National Science Day 2024 - participant

Vignanamela 4.0 - Volunteer

Duration: three days
